**NOTICE
CALNET II RFP ADDENDUM #12 RELEASE
CUSTOMER FORUM
SPECIAL ATR BULLETIN 2005-08
Thursday, August 18, 2005**

Please share this information with the appropriate managers and staffing in your organizations.

On August 15, 2005 the DTS/ONS issued a revised RFP 2053 (Addendum #12) to obtain a comprehensive set of outsourced telecommunications and network services known as the California Integrated Information Network (CALNET II).

The revised RFP 2053 and archived RFP 2053 documents dated before August 15, 2005 (Addendum #12) are available at the CALNET II Homepage at sequoiapacific.dts.ca.gov/calnetIIhomepage.asp.

For automatic notification of updates to this page, scroll to the bottom of the CALNET II Homepage and subscribe by entering your e-mail address.

DTS/ONS will be holding two RFP Customer Forums for CALNET customers and potential CALNET customers: one in Northern California (Sacramento) and one in Southern California (Los Angeles).

A 30 port, one-way audio conference bridge is available for both RFP Customer Forums. The Cost will be 8 cents per minute. The conference bridge is accessible by dialing the non toll-free telephone number 210-814-6467, followed by the pass code number 6489988.

Once the limit of 30 callers is reached, the following message will be heard: "The conference has reached capacity, please try again or contact the conference leader". There is no conference leader, so if the bridge is full, keep trying for an open port as callers disconnect.

The Sacramento session is planned for Thursday, September 8, 2005 from 10:00 AM - Noon at the DGS Auditorium located at 707 Third Street, West Sacramento (in the pyramid building known as the ZIG). There is limited street parking and a parking garage next to the building for \$12 a day or \$2 an hour.

The Los Angeles session is planned for September 7, 2005 from 10:00 AM -Noon at the Ronald Reagan Building Auditorium located at 300 Spring Street, Los Angeles. Parking is available around the building for \$6 a day.

If you have any questions please contact Pauline Tsumura of the DTS/ONS at 916 657-9448.
